PROJECTS

E-Library Management System

- Built an E-Library Management System with role-based logins (admin, librarian, faculty, student) to streamline daily operations.
- Integrated features like online notices, book request forms, and issued book tracking.
- Developed using HTML, CSS, Java, JavaScript, JSP, and MySQL to improve efficiency and minimize manual work.

Student Course Registration Portal

Built a full-stack web application where students can register, log in, enroll in courses, and view schedules, while admins manage course offerings. Implemented session-based authentication, role-based access, form validation, and CRUD operations using Spring Boot and MySQL with a responsive UI built using Bootstrap and JavaScript.
